

# Day in Life of Art Class

Art is a time for students to develop their creativity, thinking, and self expression. While learning the Elements of Art, students are engaged working with different mediums. We create whole school projects with each student's art enhancing the final masterpiece. In class, students learn new skills and improve existing skills. They create beautiful oil pastel scenes, clay sculptures, food from toilet paper, paintings, and work on drawing techniques all while learning more about dimension, perspective, color, shape and form
